

Carhartt WIP is part of the Work In Progress Holding AG. Our family-owned business group started as a licensee and European distributor of the US workwear manufacturer Carhartt in the early 1990s. Since then, it develops its own collections based on workwear originals.

Carhartt Work In Progress aims to continuously progress and evolve, without ever losing sight of its origins. Over the course of the past two decades, our business has developed organically, along with its customers, the culture that surrounds the brand, and its employees who have helped shape what Carhartt WIP is today.
